## Maths - Year 1

Pattern and Algebra 5: Finding possibilities

| Key Vocabulary |  |
| :--- | :--- |
| Pattern | A set of ordered numbers, shapes or objects. |
| Similar | Like something else but not identical. |
| Different | Unlike something else. |
| Combination | Shapes, numbers or objects joined together. |
| Group/set | A number of things put together. |
| Systematically | Working in a fixed, methodical way. |
| Estimate | Work out an answer that is nearly right. |

## Mathematical Skills

- Recognise that it is important to be well organised and to work systematically e.g. showing adding facts in order with structural apparatus.
- Make a general statement after noticing something happening regularly.

## Mathematical Methods

How many different flavours of ice cream? Find all the possibilities.

How many different $2 \times 2$ squares with Numicon shapes?

Exploring possible Numicon shape patterns with 10 pegs.

- Looking at possibilities with number facts e.g. exploring different total scores in a hoop game.

## Can you..?

- How many different patterned squares can you make out of 4 pegs? You can use any of the yellow or blue pegs.

- How many ways can you make five with the number rods?
