## Maths - Year 1

Measurement 2: Introducing the 1 p, 2p, 5 p and 10p coins

| Key Vocabulary |  |
| :--- | :--- |
| worth | The value of an amount. |
| Exchange | Swap for the same value, <br> represented in a different way e.g. I <br> can exchange two 1p coins for one <br> $2 p$ coin. |
| Pence | Unit used to measure amounts of <br> money. |
| Comparative <br> words | E.g. more, less, fewer. |

## Mathematical Skills

- Sort and identify coins correctly.
- Know the relative value of $1 p, 2 p, 5 p$ and 10 p coins.
- Make amounts up to 20p using a variety of coins.
- Find all possible combinations of coins for an amount from 5 p to 20 p.
- Give the correct amount of money up to $20 p$ when buying an item using $1 p, 2 p, 5 p$ and 10 p coins.
- Make any amount of money, up to 20p, in the smallest number of coins possible.

## Mathematical Methods

- Understanding value and exchange.
- Introducing the 1 p and 2 p coins and talking about pennies and pence.

- Adding with 1 p and 2 p coins.

- Introducing 5p and 10p coins.

- Selecting the fewest coins and investigating equivalence.

## Can you..?

- Show me how many $1 p, 2 p$ and $5 p$ coins are equal to 10 p.
- Can you find three different ways to make $15 p$ ?
- Use the coins to make three different amounts? Use four coins each time.
