## Maths - Year 2

Calculating 9: Learning times tables and multiplying through arrays

| Key Vocabulary |  |
| :--- | :--- |
| multiplying | Repeated adding of a number to find 'so many lots of <br> something', <br> e.g. 3 lots of $4=4+4+4=3 \times 4=12$. |
| Array | A rectangular arrangement of objects or numbers in rows and <br> columns. |
| Product | The result of multiplying two or more numbers together. <br> Commutative <br> property |
| Equal, equivalent | Different ways of representing the same value, <br> e.g. $6+2$ is equivalent to 8. |
| Equation | A statement that shows that two expressions are equal <br> e.g. $6+2=8$. |
| Times table | A list or table that shows the results of multiplying certain <br> numbers. |

## Mathematical Skills

- Recall some multiplying facts from 2,3, 5 and 10 times tables.
- Work in an organised way to build arrays.
- Describe an array with two multiplying sentences.
- Derive a corresponding commutative fact when given a multiplying sentence.

## Mathematical Methods

- Using ' $x 2$ ', ' $x 5$ ', and ' $x 10$ ' to calculate amounts of money with $2 p, 5 p$ and $10 p$ coins e.g. $6 \times 2 p$.

Writing the 10 times table.
$1 \times 10=10$
$2 \times 10=20$
$1 \times 10=10$
$2 \times 10=30$
$3 \times 10=30$
$3 \times 10=30$
$4 \times 10=40$
$4 \times 10=40$
$5 \times 10=50$
$5 \times 10=50$
$6 \times 10=60$
$7 \times 10=70$
$8 \times 10=80$
$9 \times 10=90$
$10 \times 10=100$

Writing the 2, 3 and 5 times tables.

Beginning to notice that multiplying is commutative, using money e.g. $2 p \times 5 p=5 p \times 2 p$.

- Making arrays for 6 , noticing the commutative property of multiplying.

Making arrays for 10.

Can you..?

- Can you tell me the product of 7 and 5 ? Can you write the number sentence? Can you show this using number rods?
- Here is a model for $3 \times 10$. Can you make a model for $10 \times 3$. what do you notice about these two number sentences?
- Can you answer these questions?

$$
\begin{aligned}
& 9 \times 10= \\
& 6 \times 3= \\
& 9 \times 3= \\
& 7 \times 5= \\
& 8 \times 2=
\end{aligned}
$$
